

And Spirit said,
"Lo, **I am** with you
always, in all ways.

I am

I am the stillness of
the dawn when the earth
draws in her first breath of
the day—a breath full of
promise and hope.

I am the silence
of the forest wrapped in
cloaks of mystery.

I am the beauty of
a flower kissed by the
morning dew.

About the Authors

Kay & Tom Seliskar

Kay and Tom Seliskar are “spiritual gypsies” who live on the road full-time in their RV traveling wherever Spirit (the Great I Am) leads them and making a difference along the way. They feel the presence of the Divine in all things and treasure their connection to the world of nature.

Kay says, “As we travel, we choose to view everyone not as strangers, but as friends we haven’t met yet. As we follow the roads of this continent, we savor the awesome beauty of nature and our fellow man. We don’t know where our travels will take us until Spirit guides us as we co-create this journey one step at a time. But every time we follow Spirit’s urging to change our direction, it becomes obvious why we have been brought to each place. We have no definitive ‘destination,’ just an intention to be of service and to be a healing presence wherever our travels lead us. And in the process, we are remembering more of who we truly are and choosing who we will become.”

Kay is a professional speaker, seminar leader, writer and spiritual intuitive who works with people to more consciously connect with the Divine. Tom is a talented scenic photographer. His vibrant ImagiNature Healing Art Images bring the healing power of nature indoors. His connection with Mother Earth runs deep, and he is dedicated to assisting her healing and evolution. To read more about their adventures go to their website at www.AppleseedEnterprises.com.
